👤 PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building scalable, responsive, and high-performance web applications using React.js, Next.js, TypeScript, and modern frontend technologies. Proficient in API integration, state management, component-based architecture, and authentication workflows. Experienced in collaborating with cross-functional teams to deliver production-ready SaaS and enterprise applications.

🧠 SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Redux UI, ShadCN UI, Redux Toolkit (RTK), React Query, Context API.

Backend & Cloud: Node.js (Basic), Express.js (Basic), MongoDB (Basic), Convex, Clerk Authentication, AWS S3

Tools: Git, GitHub, GitLab, Jira, Postman

📁 WORK EXPERIENCE

React JS Developer

Nodlays PVT LTD

06/2024 – present
Lahore, Pakistan

- Engineered and maintained 5+ large-scale **SaaS** and **MVP** applications from conception to production using **React.js**, **Next.js**, and **TypeScript**, ensuring high-performance rendering and a fully responsive user experience.
- Developed a modular, reusable UI component library using **Tailwind CSS**, **Material UI**, and **ShadCN UI**, reducing code duplication and accelerating frontend delivery by 25%.
- Successfully integrated and optimized complex **RESTful APIs**, leading to faster data retrieval, reduced page load times, and a more seamless user experience.
- Implemented **JWT authentication** and Role-Based Access Control (**RBAC**), enabling fine-grained user permissions, securing protected routes, and ensuring secure user interactions throughout the platform.
- Architected global state management solutions using **Redux Toolkit** and **Context API**, reducing redundant API requests and improving application performance across data-intensive workflows.
- Integrated **AWS S3** for secure document upload, storage, and retrieval, supporting document processing workflows.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, participating in feature planning, code reviews, testing, and production releases.
- Utilized **Git**, **GitLab**, and **Jira** for version control, CI/CD workflows, issue tracking, and efficient team collaboration.

MERN Stack Trainee

SeeBiz PVT LTD

01/2024 – 06/2024

Lahore, Pakistan

- Built responsive user interfaces, landing pages, and UI components using React.js, HTML5, CSS3, and JavaScript with focus on reusable component architecture.
- Developed and integrated RESTful APIs using Node.js and Express.js for full-stack application workflows.
- Gained hands-on experience in frontend-backend integration, API testing, and asynchronous JavaScript handling.

PROJECTS

Cohere (SaaS Marketplace Platform) | Frontend Developer

Technologies: React.js, Redux, Context API, Stripe API, SCSS, Styled Components, Material-UI.

- Developed and maintained a SaaS marketplace application, enabling coaches to create, publish, price, and manage digital services, including live sessions, group courses, workshops, and communities.
- **Took ownership** of multiple frontend modules, translating business requirements into production-ready features while maintaining and enhancing an existing React codebase.
- Integrated and optimized **Stripe payment workflows**, implementing secure checkout experiences, subscription management, payment status handling, and asynchronous client-side payment flows for seamless transactions.
- **Strengthened** client-side Role-Based Access Control (**RBAC**), ensuring secure and role-specific experiences for coaches and clients throughout the platform.

AwardGenie (AI-Powered Award Management MVP) | Frontend Developer

Technologies: React.js, Redux Toolkit, Clerk Auth, ShadCN UI, Tailwind CSS

- Developed the frontend architecture for an **AI-powered** award management MVP, enabling organizations to create AI-driven company profiles and accelerate award application workflows.
- Implemented **Clerk-based authentication**, protected routing, and role-based access control while synchronizing user session state with Redux Toolkit.
- Integrated **AI-powered** workflows that enabled users to generate, review, edit, and submit award applications, streamlining the overall submission process.
- Collaborated with **cross-functional teams** to translate evolving business requirements into maintainable, high-quality frontend solutions within an Agile development environment.

Muster360 (Enterprise Workflow Management Panel) | Frontend Developer

Technologies: React.js, Redux Toolkit, react-i18next, react-konva, react-pdf, jsPDF, html2canvas, Radix UI, Tailwind CSS.

- Architected and delivered a scalable enterprise admin panel, enabling end-to-end job management, expert review workflows, partner administration, and secure business operations.
- Engineered an interactive diagram panel using **React Konva**, enabling users to design, preview, and export complex system layouts as high-quality PDFs through **jsPDF**, React PDF, and **html2canvas**.
- Implemented enterprise-grade frontend security features, including **2FA recovery**, administrator **impersonation**, session timeout management, Axios interceptors, and CSRF-protected API communication.
- Enhanced application reliability by implementing Progressive Web App (**PWA**) capabilities and engineered a modular internationalization framework using **react-i18next** to support multilingual enterprise deployments.

EDUCATION

BS-Software Engineering

University of Gujrat 

09/2018 – 10/2022

Gujrat, Pakistan
